

DECISION COMPUTER GROUP

Architect, Designer & Manufacturer of Next Generation Cyber Security & Digital Forensics Solutions

People	Technology	R&D	Regional presence	Channel Network	Customer Base	Financial Strength	
Vision			Mission		Strategy		
Leading architect, designers and manufacturer of Digital Forensics software and services to the e-business world; building security protection of our clients, our peoples and our shareholders			Global Domination in supply and managed advanced digital forensics solutions and services which enable our local and global customers to meet or exceed their business objectives		Global Scale Business through our strategic and technology partners		
Partner choice	Customer choice	Steady growth in market Share for our software solutions		Global Penetration	Partners' commitment		
Proven Solutions in the Security Market							
Content Reconstruction	Internet Sniffer & Surveillance	Content Auditing	Forensics Recorder	Data Leakage Prevention	Record keeping	Cyber Security	Wireless Security

ABOUT DECISION COMPUTER

- Founded in 1986 by team of Professors and IT Professional in Taiwan.
- Global HQ and R&D Centre in Taipei/Taiwan.
- Well established Regional HQ in USA, Germany and Singapore.
- Sales revenue: Europe-35%, Asia-25%, America-25%, Oceania-15% & Africa-15%
- Over 100 employees.
- Extensive technical experience in IT/Cyber Security and Forensics Analysis technologies.
- World leading Internet software developer and OEM/ODM Manufacturer
- Over 1000 strategic partners in more than 97 countries

WHY DECISION COMPUTER ?

Decision offers a combination of technology solutions, services and education to help our customers to protect their intellectual property within the organisation. Though a strategic approach to forensics security, we enable customers to optimize their security investment and proactively protect their most important information assets from potential threats.

OUR TEAM

We are committed to provide trusted security services and solutions. Our design of technology have been proven with the experience of numerous security engagements with professors, professional and well trained Engineers and staffs who are thought leaders and experts in providing information security solutions, performance of security assessments and consultancy. Our team is extreemly familiar with all level of security issues and methods employed by these security expertise.

OUR RESEARCH AND DEVELOPMENT (R&D)

We have a team of experienced professors, professional and very well qualified engineers, constantly monitor the market trend, changes, reseach and develop new products based on market demand. At the same time, we provide features customization to tailored to suit each customer's environment and needs.

OUR PRODUCTS & SOFTWARE SOLUTIONS

Decision develops and sells E-Detective security software, bundled with specialized hardware or standalone.

ON-LINE SERIES OF PRODUCTS:-

Model	Name in short	Basic function	Target Market
Wired E-Detective (Standard version)	EDSS	Complete LAN Interception System	All sectors
Wired E-Detective (Forensics version)	EDFS	Complete LAN Interception System	Forensics & Government agencis
Wired E-Detective (Standard version)	EDS-SW	Software only - LAN Interception System	All sectors
Wired E-Detective (Forensics version)	EDF-SW	Software only - LAN Interception System	Forensics & Government agencis
Wired E-Detective (Standard version)	EDS-LOG	Software only - LAN Interception System (LOG ONLY – Without Content) – FREE SW	All sectors

Model	Name in short	Basic function	Target Market
Wireless Detective (Standard version)	WDSS	Complete Wireless Interception System, based on IEEE 802.11 a/b/g standard	Forensics, Law Enforcement dept and Government agencis
Wireless Detective (Enhance version)	WDES	Complete Wireless Interception System, based on IEEE 802.11 a/b/g standard with additional build-in antennas	Forensics, Law Enforcement dept and Government agencis
Wireless Detective (Extreme version)	WDXS	Complete Wireless Interception System, based on IEEE 802.11 a.b.g with more features (Launching in end08 or early 09)	Forensics, Law Enforcement dept and Government agencis

Model	Name in short	Basic function	Target Market
HTTPS/SSL	SSL	MITM and Offline Decryption	Forensics, Law Enforcement dept and Government ageneicis Forensics
WatchGuard.WLAN	WatchGuard	Wireless Jammer	All Sectors
WatchDog.NET	WatchDog	Breakdown diagnosis and systems reset device for AP in wireless network	All Sectors
W-Forbidder.WLAN	WForbidder	Wirless LAN Defends System	All Sectors

OFF-LINE SERIES OF PRODUCTS:-

Model	Name in short	Basic function	Target Market
Write-Block	Write-Block	Forensics write protection device	Forensics, Law Enforcement dept and Government ageneicis
E-Detective Decoding Centre	EDDC	Offline Raw Data files reconstruction software for CaselD	Forensics, Law Enforcement dept and Government ageneicis
E-Detective Forensics Analysis Tool	EDFAT	Offline PCAP Raw Data file reconstruction software <i>(New product to be lauched in end 2008 or early 2009)</i>	Forensics, Law Enforcement dept and Government ageneicis

MARKET

Decision serves government, forensics dept, law enforcement agencis, security consulting firms, Telco/ISP and Global 2000 enterprise customers that are concerned about security. Our products are relied upon by customers worldwide. When you need to defend against intrusion attempts, and monitor network usage by employees, via the International and national Internet gateway, call one of our security specialists!

ARCHITECTURE AND PROCESSES

- ⦿ E-Detective silently monitors your network, captures whole packets (not just headers alone), decode and fully reconstruct the raw data captured in the “on the fly” in the “ON-LINE MODE” or archives that traffic for future session and packet analysis in the ‘OFF-LINE MODE”.
- ⦿ E-Detective system (Ethernet LAN interception system) utilizes sniffer technology by using a HUB (Broadcast) or a Port Mirroring (SPAN) Switch to collect network packets (Internet), decodes and reconstructs them in order to display the content into readable and exact format.

- ⦿ Internet Monitoring and content reconstruction function: Email (POP3, SMTP, IMAP, Webmail Read and Webmail Sent), IM/Chat (Yahoo, MSN, AOL, ICQ, QQ, GoogleTalk TW, IRC, Skype VOIP log), File Transfer (P2P, FTP), HTTP (HTTP Link, HTTP Content, HTTP Reconstruct, HTTP Download/Upload, Video Stream)), Telnet, Online Game, VOIP (Yahoo Messenger) and Webcam (MSN and Yahoo Messenger) etc.
- ⦿ Other management functions: Search by Parameters, Search by Keywords, Association Search, Alert (by keyword, throughput etc.), Backup (Auto, Manual, FTP), Reporting (Single, Group, Statistical – Top-Down View) etc.
- ⦿ You're presented with a database of session data, powerful search tools for investigation and analysis, graphs and reports, and access to all the reconstructed files. And should you need raw packet-by-packet data analysis, that's available as well in our “off-line” forensics analysis product solutions.

OUR EDUCATION

Apart from the standard product training, we also provide various high-level, hands-on security and forensics training courses designed to meet the needs of individuals, departments and organisation.

OUR BUSINESS MODEL

Our success come from the close cooperation with our business partners. With their strength and strong networking experience in their respective market, it helps to reach to all potential market. We promote and distribute our distinctive products via the following business models.

- VAD – Value-Added Distributor
- SP – Strategic Partner / Reseller
- OEM or ODM Partner
- Technology Partner

OUR GLOBAL NETWORK

As of today, we have more than thousands of Distributor, Strategic Partner, Reseller, OEM partner, ODM partner, Technology partner and other business partners spread over North Asia, South Asia, South East Asia, Middle East, Africa, Europe, North and South America.

ENQUIRY

1. Customization of our current products is available, subjected to the individual requirement. Please contact us for the cost of the Research & Development work.
2. For enquiry on relationship management, sales and marketing, please feel free to contact me.
